

PLATINUM 5 PLUS contains a selected range of nutrients designed to promote colour and growth. The addition of seaweed will assist in root growth and the organic acid will increase plant health available exclusively through Oasis Turf.

PLATINUM 5 PLUS is a unique blend of Nitrogen plus micronutrients that will assist in photosynthesis that intern stimulates plant growth. The kelp in Platinum 5 Plus will stimulate the plant to produce its own biostimulants, and trigger its own metabolites that are transported to the root tips, causing them to elongate and generate its own cytokinins.

Product Features

- Seaweed to assist root growth
- Increases root mass and elongation
